

New Kettle Chip Plant Announcement

Coming Soon

We are excited to announce the grand opening of our new state-of-the-art kettle chip plant in May of 2026, right here in the heart of Maine! This facility represents a perfect fusion of Maine's rich agricultural tradition and the latest in modern production technology, ensuring that our chips are made with both exceptional quality and consistency.

At Taste of Maine Potato Chip Co we are proud to use **locally grown Maine potatoes**, sourced directly from Maine's hardworking farmers. These potatoes are carefully selected and cooked in small batches to guarantee superior flavor and texture in every chip. Our commitment to **premium ingredients** ensures that every bag of chips reflects the taste and quality that Maine is known for.

Once fully operational, our plant will feature **four kettles**, with an initial capacity to produce **15 million pounds of finished product per year**. Additionally, we have the flexibility to add **four more kettles**, allowing us to scale production and increase our capacity to **30 million pounds of finished product per year** as demand grows. This scalable design ensures we can meet the needs of both current and future customers while maintaining the highest standards of quality control.

Our brand-new facility has been designed with both efficiency and consistency in mind, enabling us to create the finest kettle chips, while also remaining agile in a fast-moving market.

We are actively seeking **Private Label and co-packing opportunities** with like-minded brands that share our passion for quality, sustainability, and great taste. If you are looking for a reliable partner who values both tradition and innovation, we would love to explore how we can work together.

We look forward to hearing from you and discussing the many possibilities this new venture will bring. Thank you for your time, and we are excited about the potential to collaborate and create something special together.

Warm regards,

Bruce Sargent
